

Distributed Learning Based On Free Open Educational Resources

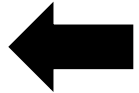

Do students learn autonomously?

Do students learn through videos?

Distributed learning

Students learn autonomously, especially through videos

Why this subject?

This student, on the left (that actually is me) never appreciated study too much

→ mainly by the traditional method (homework and more homework)

→ he started looking for educational alternatives (as we all do)

Distributed learning

Students learn autonomously, especially through videos

Traditional Education

Classroom

Physical space

Teachers

Students

**Some
equipment**

Distributed learning

Students learn autonomously, especially through videos

Learning based on technology

+

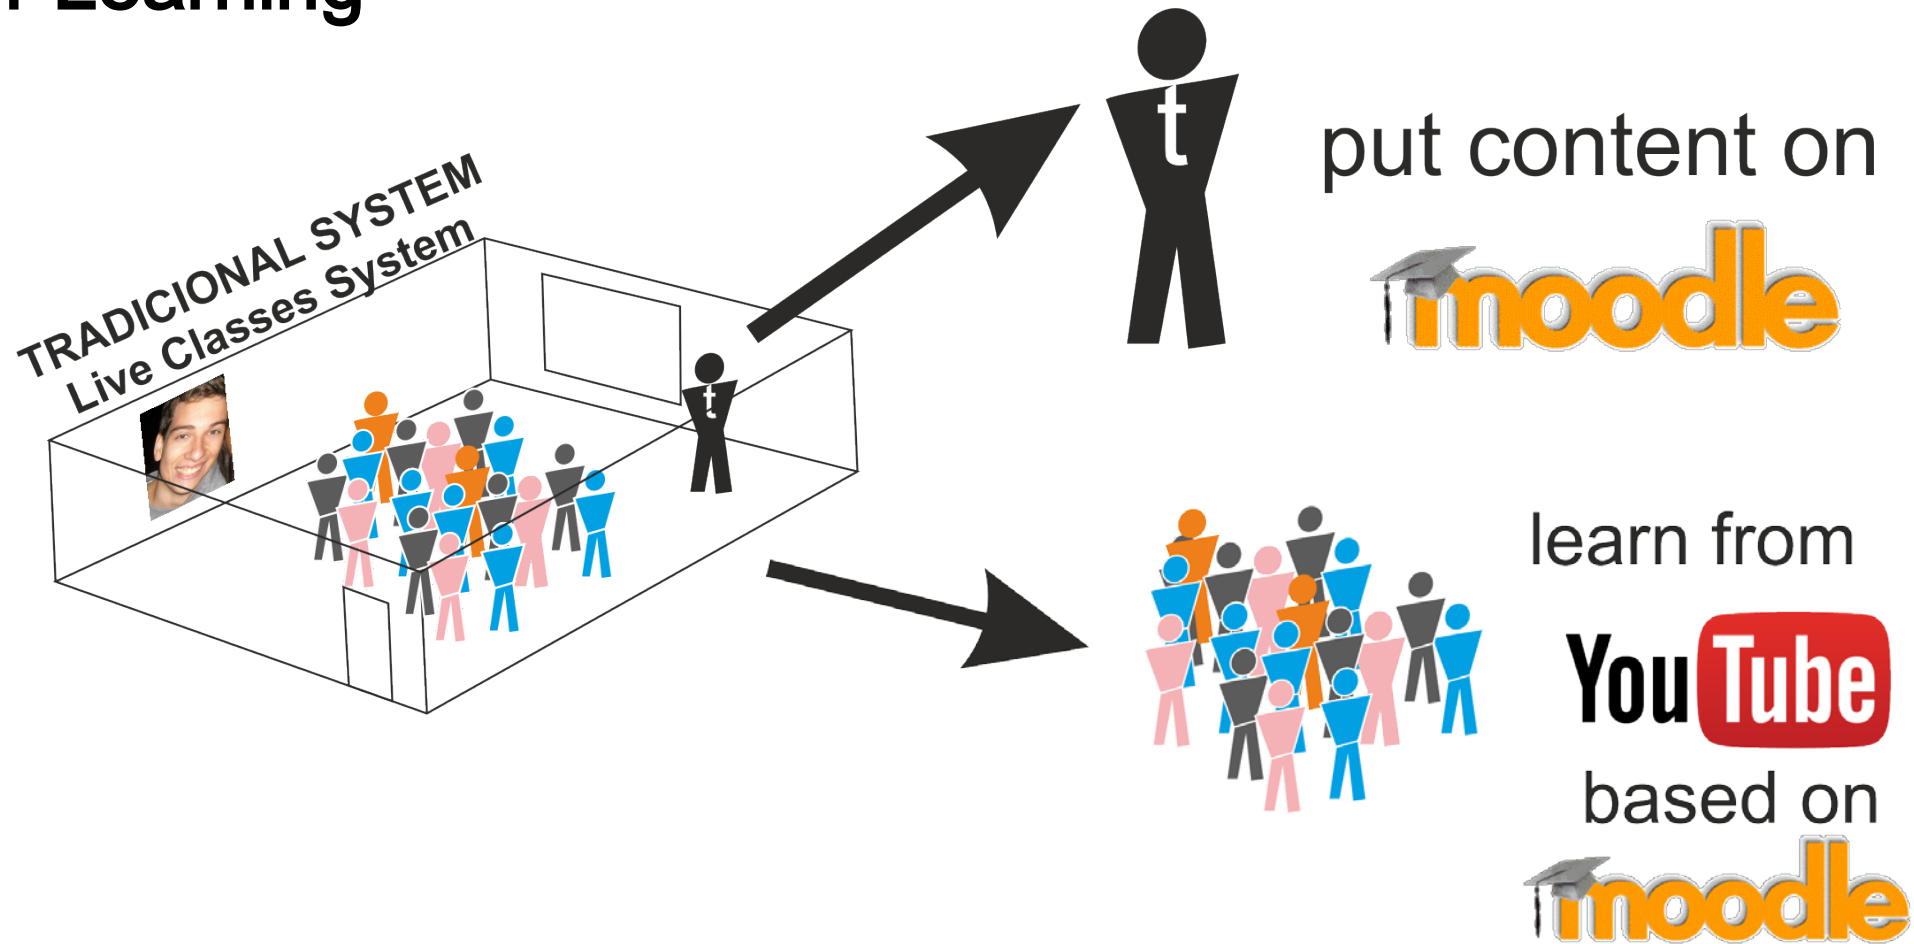

Wifi

Distributed learning

Students learn autonomously, especially through videos

Self-Learning

Standard movement

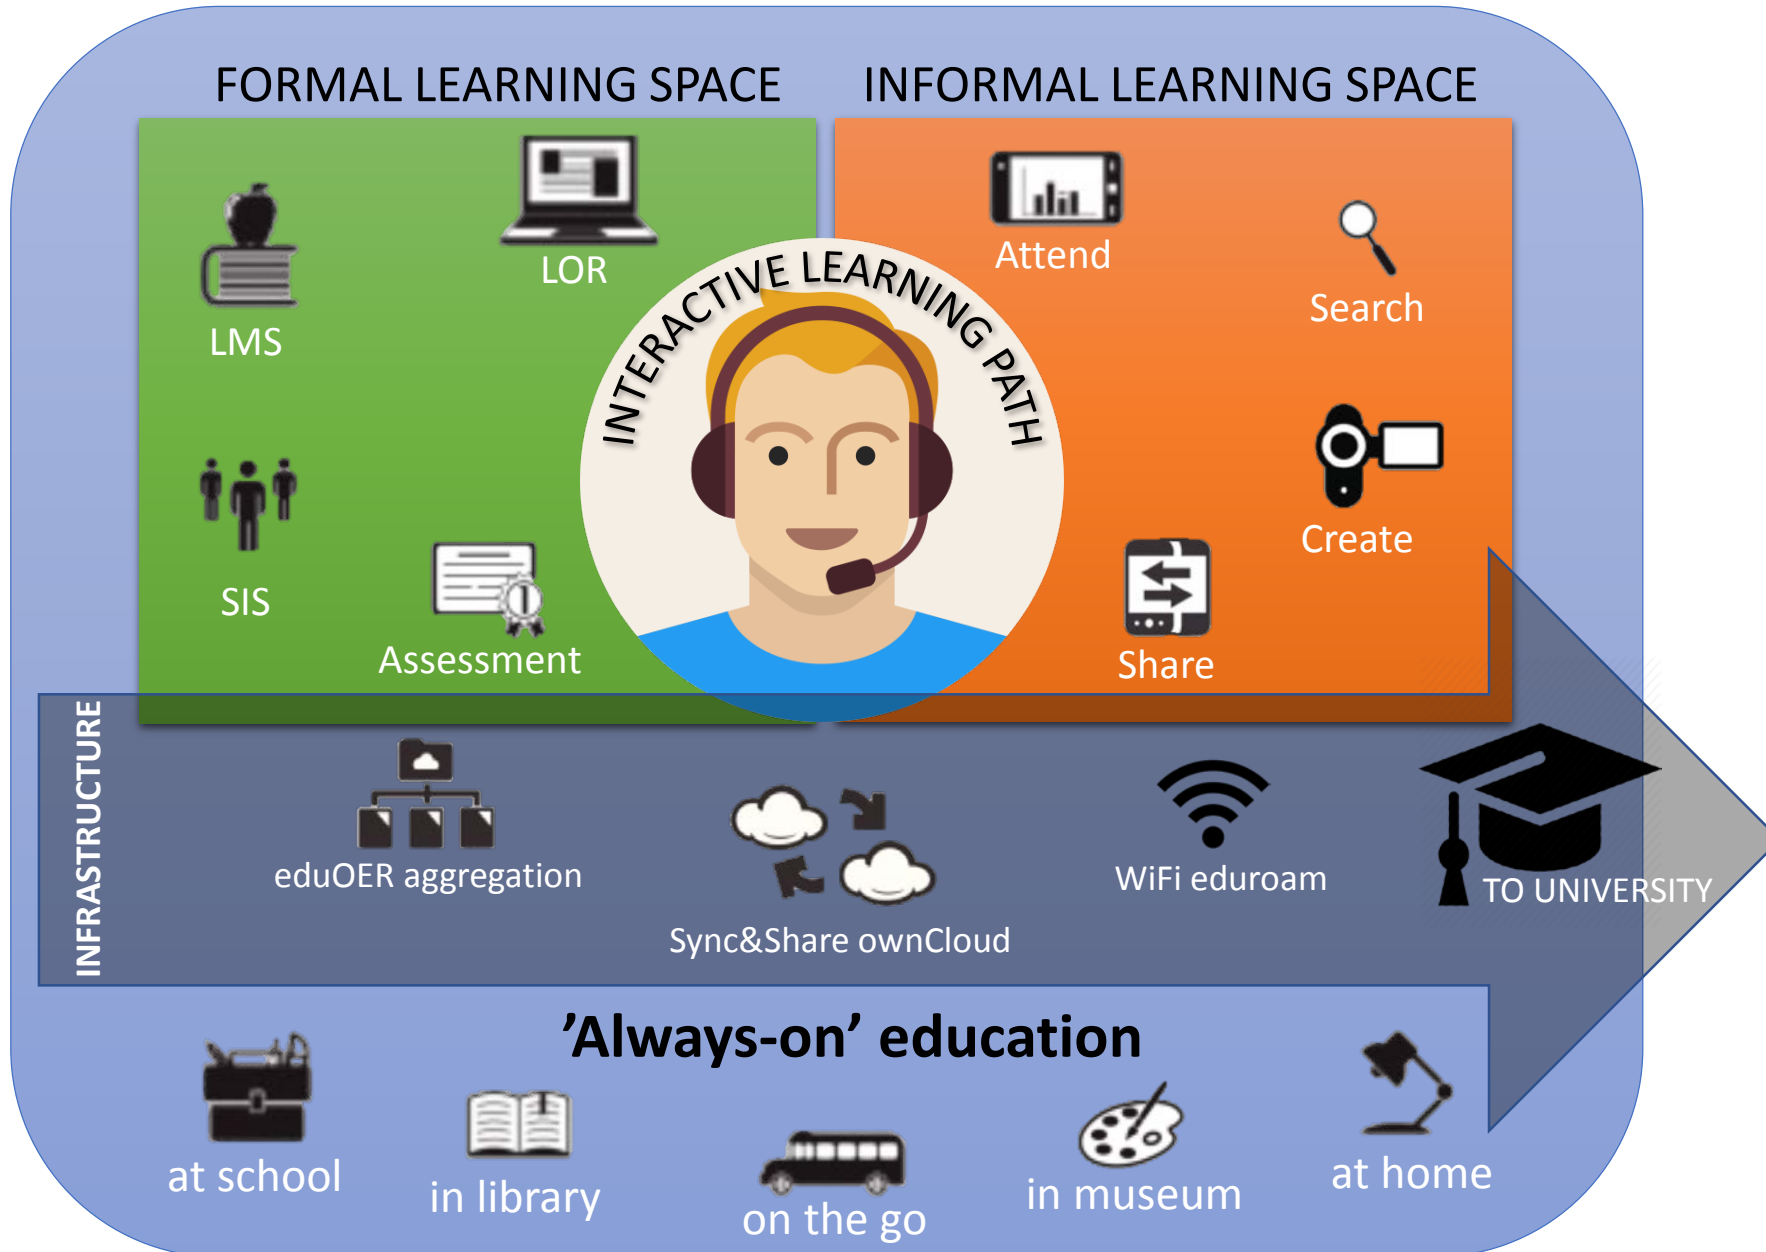

Organic Education

1. Personalized
 2. Strong teacher support
 3. Close community links
 4. Broad and diverse curriculum
 5. Outside and inside school involvement
- Create the right conditions and children will learn!
